

**INDIAN
MOUNTAINEERING
FOUNDATION**

APEX NATIONAL BODY

Indian Mountaineering Foundation (IMF) has taken on the goliath task of experience mapping the entire Indian Himalayas. The IMF Webinar Series is an initiative of the IMF to draw upon the experiences of accomplished Himalayan explorers, travellers, photographers, adventurers and create a virtual library of the Himalayan region.

It gives an opportunity to connect and interact with the youth and wider adventure community across the world and create a medium to learn skills which will keep one safe in the outdoors. The short duration webinars provide myriad information on topics ranging from Himalayan peaks, topography, culture, environment, biodiversity, risk factors and medical issues at high altitude by subject specialists, which can inspire and mould future generations of adventurers and explorers.

The IMF Webinar Series is curated by members of the Webinar Editorial Board who utilize their specific skill to identify and moderate suitable content and create a memorable audio-visual resource which can catch the attention of a wide audience.

If you have a story to share, write in to us at maninderkohli@gmail.com
